Jill Lepore on the ‘Artificial State’ and why Silicon Valley’s leaders are bad sci-fi readers

Historian Jill Lepore has a theory about why tech companies often use soaring language to describe their products — almost as if they’re forming a new government. And whether you’re thinking of Twitter’s old “town hall in your pocket” or Anthropic’s Claude constitution, it’s a theory that doesn’t pa

OpenAI puts the brakes on a new model because it’s supposedly too powerful

OpenAI says it is pausing "internal activities" around an in-development AI model, Astra, because it doesn't yet meet new security standards the company is putting in place. The announcement follows its recent disclosure that OpenAI models accidentally hacked Hugging Face. Anthropic and Meta have al

Watching Roku’s AI channel is like eating from a trough

The appeal of free ad-supported streaming television (FAST) channels has always been the way they make it easier to (re)discover classic films and series. But Roku's latest experiment in the FAST space has less to do with traditionally produced entertainment and is entirely focused on giving viewers

Jony Ive’s first OpenAI gadget is reportedly a hockey puck-sized smart speaker

The AI device OpenAI is developing with former Apple designer Jony Ive is "essentially a smart speaker without a display" that's battery-powered, doughnut-shaped and roughly the size of a hockey puck, according to Bloomberg reporter Mark Gurman. The device, expected to launch in 2027 for a price ove

Fenix Flexin isn’t even denying using AI to make ‘Rubberz’ anymore

It took long enough, but now LA rapper Fenix Flexin appears to have admitted using AI for the 80s synth pop-themed song "Rubberz." His comments follow the producer Medasin's videos claiming that an AI tool called Treblo (formerly Sonauto) was used to make the song, and the company releasing an AI de
